

Edmentum Log - In Information For Math Summer Practice: Gr. 6-8

Students are encouraged to practice math skills on the Edmentum site over the summer months in order to stay current with the skills learned during the school year. It also provides enrichment on more advanced skills.

The students are very familiar with this site because they used it to take their end of the year 3rd Benchmark test.

If you wish for your child to retake the 3rd Benchmark Test which was given in May, please contact Mrs.B at bokuniewicz@srles.com and she can reset it for your child. The link to begin testing the Math Diagnostic Test will appear on the student's main page after it has been reset.

Retaking the Test is optional and is not required unless you wish to have your child take the test again.

Students can practice skills without retaking the Benchmark Test.

Students should receive no help on this test.

To practice math skills follow these steps:

Step One: The website address is: <https://www.clever.com/in/diobpt>

Step Two: Log in with the student's school email address and password.

Step Three: Go to the grade level or topics and choose the skills to work on.
